

## Stonington South Pier Rehabilitation Project - Summary Description

The proposed work involves the restoration of the south wharf at the Stonington Town Dock Complex in Stonington Harbor. This project is to reconstruct and rehabilitate the exterior perimeter of the south wharf including the placement of erosion protection, concrete, geo-textile fabrics, crushed stone and gravel then repaving the surface. The work has been designed to be executed in segments based on funding availability.

Plans and specification will not be available until Monday, August 10, 2009, in the Department of Administrative Services. Technical questions should be addressed to:

Larry Sullivan, PE
